Transdisciplinary approaches in biotechnology and medical engineering research

## National Bioengineering Conference, 22-23 Dec 2022

Theme: Transdisciplinary approaches in biotechnology and medical engineering research

#### **About the Department**

The Department of Biotechnology and Medical Engineering was established in 2007 with the objective of providing a multidisciplinary research and teaching program in Biotechnology and Medical Engineering that advances fundamental understanding of how biological systems operate and to develop effective biology-based technologies for applications across a wide spectrum of societal needs including innovations in diagnosis, therapy of human diseases, design of novel biomaterials, biomedical devices, and in solving environmental hazard. The faculty members have diverse research interests and they conduct both basic and applied research in diverse areas such as Cell & Molecular Engineering, Tissue Engineering & Biomaterials, Bioprocess Engineering, Environmental & Plant Biotechnology, Biomechanics & Biotransport Engineering, and Medical Electronics & Instrumentation.

#### About the conference

Bioengineering conference is an annual event organized by the Department of Biotechnology and Medical Engineering at NIT Rourkela to bring together undergraduates, postgraduates, research scholars and researchers working in the area of bioengineering. The theme of this year's conference is "Transdisciplinary approaches in biotechnology and medical engineering research". We are at an important juncture where the technology and sophisticated tools are been applied at the best of our knowledge for solving problems of interdisciplinary interest in bioengineering. The focus is also to share the experiences, post pandemic era, on the dynamics of the interdisciplinary approaches in solving problems of relevance to bioengineering. We hope to the conference will serve as a best platform to learn and share the new ideas in the area by connecting the stakeholders involved, particularly students, faculties, engineers, doctors, entrepreneurs, incubators, and enthusiasts. The conference will serve to inspire the new generation of bioengineers to come up with novel, translatable ideas in order to meet the needs of national and international community.
